

Restoring Wellness IV Therapy and Ozone Therapy Menu

An Integrative Medicine consultation with Dr. Mickey is advised before starting most IV therapies, to ensure you formulate a proper treatment plan with proper follow up.

- **Meyers Cocktail** – The “mainstay” IV treatment for overall wellness. This combines a variety of minerals and vitamins that help with cellular hydration, repair and detoxification.
- **Adrenal Support** – Combines our potent Meyers Cocktail of vitamin and minerals with an Adrenal Extract to help nourish over-worked and fatigued adrenal glands.
- **Amino Acids** – Wonderful “alphabet soup” of amino acids utilized by the body and brain to produce a myriad of proteins necessary to build important neuro-transmitters for optimal brain functioning. Very effective treatment for depression, anxiety, PTSD, ADHD and Autism.
- **Double Aminos*** – Extra-potent dose of amino acids to alleviate even the most severe depression, anxiety, insomnia and even assists with substance withdrawal syndromes.
- **Alpha Lipoic Acid** – ALA is an amino acid utilized by the body for several different processes including cardiovascular health, but really shines in its role at healing injured nerves that cause peripheral neuropathy pain.
- **DMPS Chelation** – Used to effectively lower and eliminate toxic mercury from the body.
- **EDTA Chelation** – Best known for treating heavy metal toxicity, especially lead. However, after many years of research, it has been shown to really shine in improving blood circulation by treating calcified arterial plaques in coronary artery and peripheral vascular disease.
- **Plaquex (Phosphatidylcholine)** – A powerful “detergent-like” substance used in combination with EDTA chelation in patients with CAD, to help dissolve the “fatty” plaques that impede proper arterial blood flow.
- **NAD*** – Enhance energy production, brain function and slow down the aging process with this amazing infusion, the latest discovery in Anti-Aging medicine.

- **PK Protocol*** – Adjuvant treatment used with HDOT to treat tough chronic infections such as Lyme Disease.
- **Pur-C*** – The latest immune-boosting therapy with a powerful form of Vitamin C, in a range of doses to meet your individual needs.
- **Glutathione*** – This “powerhouse” antioxidant is used to enhance our Meyers Cocktail and Ozone treatments, for added energy generation and detoxification.

Ozone Therapy - Using activated O2 to stimulate regeneration, detoxification and healing throughout the body.

- Prolozone Therapy_____
- Minor AutoHemotherapy (mAH)_____
- Ozonated Saline_____
- High-Dose Ozone Therapy (HDOT) IV_____
- Chezone_____

A combination of the powerful multi-pass HDOT and EDTA chelation in one treatment to boost the arterial plaque-busting benefits of both.
